

# Optometry

Optometrists provide primary vision care, including comprehensive eye examinations and the diagnosis, treatment, and management of most eye conditions and diseases. To prepare you as a professional capable of meeting this broad scope of responsibilities, the curriculum at Berkeley Optometry is designed to provide first-rate clinical training as well as instruction in the science of vision.

Our world-class faculty (<http://optometry.berkeley.edu/faculty/introduction>) offer comprehensive clinical training enhanced by cutting-edge education in vision science. They will prepare you to meet the challenges of expanding primary eye care (see Career Facts (<http://optometry.berkeley.edu/admissions/career-in-optometry>)). You will acquire knowledge of cell and molecular biology, pharmacology, genetics, epidemiology of eye disorders, and state-of-the-art clinical technology. You will also have training in all clinical areas, including primary care and specialties such as binocular disorders, contact lenses, low vision, ocular disease, geriatrics, pediatrics, and refractive surgery.

## The Clinics

Berkeley Optometry operates its teaching clinics on a twelve-month basis. Our students have progressively more clinical training and responsibility as they advance through the four-year degree program. Third-year students spend about half their time in clinic, while fourth-year students spend virtually all their time in clinic.

One key element in the Berkeley Optometry program is the provision of in-depth clinical experience in a variety of settings. Our intensive-training clinics (<http://optometry.berkeley.edu/admissions/the-clinic-experience>) (On-Campus Clinics, Off-Campus Externship Clinics, and Community Outreach Clinics) offer services to populations associated with our Berkeley Optometry clinics or affiliated clinics around the country and the world.

The Meredith Morgan Eye Center provides comprehensive eye care to members of the Berkeley campus and the local community. There are more than 80,000 patient visits each year for which our faculty and students provide a full range of services from primary eye care to the diagnosis and management of vision problems caused by diseases such as glaucoma, cataracts, and diabetes. All students also participate in external clinical rotations. At the end of the four-year OD Program, each student will have, on average, examined 2,500 patients.

## The Curriculum

Berkeley Optometry makes a major contribution to the field of health care by training skilled practitioners through a curriculum that is continuously updated to reflect the latest in research and clinical training. We are dedicated to keeping pace with the expanding field of optometry and the profession's move toward a more extensive health science model of primary care.

As you look through the course descriptions in our curriculum (<http://optometry.berkeley.edu/students/curriculum-od-program>), you will see the depth and range of study and training offered by our Optometry program. One exciting and effective approach is introducing our students to clinical education from the first day.

For example, OPTOM 200A (Clinical Examination of the Visual System; fall semester) is taught in the first semester of the program, when you will learn how to take case histories, perform preliminary examinations

of the eye, and measure refractive error. By the spring of your first year, OPTOM 200B (Clinical Examination of the Visual System; spring semester) will introduce you to advanced examination techniques. These clinical procedures will be complemented by course work in biology, optics, and pharmacology. We have found that this early introduction to the clinical examination, combined with basic science courses, makes the learning of optometry interesting and relevant. Please look at our curriculum and see for yourself how we integrate clinical and basic science from the beginning.

## Admission to the Doctor of Optometry (OD) Program

**Note:** Applicants for optometric study in the United States and Puerto Rico use a common application service, OptomCAS. By utilizing a common application service, prospective students file one application that can be sent to multiple schools and colleges of optometry. The Admissions and Student Affairs Office is thrilled to be a participant OptomCAS school as we strive to make the application process more efficient and convenient for you.

More information can be found here: [www.optomcas.org](http://www.optomcas.org) (<http://www.optomcas.org>)

To be considered for admission to the School of Optometry in full-time regular status, you must meet the *Application Requirements*. More detailed information can be found on our website (<http://optometry.berkeley.edu/admissions/regular-status-students>).

## Curriculum by Year (OD Program)

### First-Year Curriculum (38.5 units)

#### Fall

OPTOM 200A	Clinical Examination of the Visual System
OPTOM 200AL	Clinical Examination of the Visual System
OPTOM 499	Supervised Independent Study
VIS SCI 203A	Geometric Optics
VIS SCI 205	Visual Perception Sensitivity
VIS SCI 206A	Anatomy and Physiology of the Eye
VIS SCI 206D	Neuroanatomy and Neurophysiology of the Eye and Visual System

#### Spring

OPTOM 200B	Clinical Examination of the Visual System
OPTOM 200BL	Clinical Examination of the Visual System
OPTOM 222A	Optics of Ophthalmic Lenses
VIS SCI 203B	Optical System and Physical Optics
VIS SCI 206B	Anatomy and Physiology of the Eye and Visual System
VIS SCI 217	Oculomotor Functions and Neurology
VIS SCI 219	Binocular Vision and Space Perception

### Second-Year Curriculum (34 units)

#### Fall

OPTOM 200C	Clinical Examination of the Visual System
OPTOM 200CL	Clinical Examination of the Visual System
OPTOM 213	Evidence Based Optometry
OPTOM 222B	Advanced Clinical Optics
OPTOM 226A	Systemic Pharmacology
OPTOM 236A	Systemic Disease and its Ocular Manifestations

OPTOM 270B	Eyecare Business and Professional Management I
VIS SCI 215	Visual System Development

**Spring**

OPTOM 200D	Clinical Examination of the Visual System
OPTOM 200DL	Clinical Examination of the Visual System
OPTOM 226B	Ocular Pharmacology
OPTOM 236B	Systemic Disease and its Ocular Manifestations
OPTOM 240	Diagnosis and Treatment of Sensory/Motor Anomalies
OPTOM 260A	Contact Lenses: Examination Principles and Practice
VIS SCI 206B	Anatomy and Physiology of the Eye and Visual System

**Third-Year Curriculum (45.5 units)****Summer**

OPTOM 430A	Optometry Clinics
OPTOM 432	Introduction to Clinical Topics for the New Clinician

**Fall**

OPTOM 241	Advanced Management and Rehabilitation of Sensory/Motor Anomalies
OPTOM 246	Diagnosis and Treatment of Anterior Segment Ocular Disease
OPTOM 251	Low Vision
OPTOM 430B	Optometry Clinics
OPTOM 435	Advanced Procedures in Ocular Disease Diagnosis

**Spring**

OPTOM 256	Diagnosis and Treatment of Posterior Segment Ocular Disease
OPTOM 270C	Eyecare Business and Professional Management II
OPTOM 430C	Optometry Clinics

**Fourth-Year Curriculum (46 units)****Summer**

OPTOM 440A	Advanced Optometry Clinic
OPTOM 441A	Specialty Clinics

**Fall**

OPTOM 440B	Advanced Optometry Clinic
OPTOM 441B	Specialty Clinics
OPTOM 450A	Grand Rounds and Seminar

**Spring**

OPTOM 440C	Advanced Optometry Clinic
OPTOM 441C	Specialty Clinics
OPTOM 450B	Grand Rounds and Seminar

- Optometry (p. 2)
- Vision Science (p. )

**Optometry****OPTOM 200A Clinical Examination of the Visual System 2 Units**

Terms offered: Fall 2015, Fall 2014, Fall 2013

Fundamentals of the optometric examination. Case history, visual acuities, objective and subjective methods of determining refractive status. Basic examination of anterior ocular structures and the ocular fundus; perimetry.

Clinical Examination of the Visual System: Read More [\[+\]](#)

**Hours & Format**

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

**Additional Details**

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

**Formerly known as:** 100A

Clinical Examination of the Visual System: Read Less [\[-\]](#)

**OPTOM 200AL Clinical Examination of the Visual System 3 Units**

Terms offered: Fall 2017, Fall 2016, Fall 2015

Fundamentals of the optometric examination. Case history, visual acuities, objective and subjective methods of determining refractive status. Basic examination of anterior ocular structures and the ocular funds; perimetry.

Clinical Examination of the Visual System: Read More [\[+\]](#)

**Rules & Requirements**

**Repeat rules:** Course may be repeated for credit when topic changes.

**Hours & Format**

**Fall and/or spring:** 15 weeks - 6 hours of laboratory per week

**Additional Details**

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

Clinical Examination of the Visual System: Read Less [\[-\]](#)

## OPTOM 200B Clinical Examination of the Visual System 2 Units

Terms offered: Spring 2016, Spring 2015, Spring 2014

Classification and epidemiology of refractive errors, evaluation of accommodative and binocular status. Tonometry, advanced techniques of examining the posterior pole, evaluation of visual pathway function.

Clinical Examination of the Visual System: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** 200A

**Repeat rules:** Course may be repeated for credit when topic changes.

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

### Additional Details

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

**Formerly known as:** 100B

Clinical Examination of the Visual System: Read Less [\[-\]](#)

## OPTOM 200BL Clinical Examination of the Visual System 3 Units

Terms offered: Spring 2017, Spring 2016, Spring 2015

Classification and epidemiology of refractive errors, evaluation of accommodative and binocular status. Tonometry, advanced techniques of examining the posterior pole, evaluation of visual pathway function.

Clinical Examination of the Visual System: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Opt 200A, Opt 200AL

**Repeat rules:** Course may be repeated for credit when topic changes.

### Hours & Format

**Fall and/or spring:** 15 weeks - 6 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

Clinical Examination of the Visual System: Read Less [\[-\]](#)

## OPTOM 200C Clinical Examination of the Visual System 2 Units

Terms offered: Fall 2015, Fall 2014, Fall 2013

Case analysis of refractive, accommodative, and binocular anomalies. Pediatric examination techniques. Advanced methods of examining the peripheral ocular fundus; anterior chamber angle evaluation.

Clinical Examination of the Visual System: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** 200B

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

### Additional Details

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

**Formerly known as:** 100C

Clinical Examination of the Visual System: Read Less [\[-\]](#)

## OPTOM 200CL Clinical Examination of the Visual System 2 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Case analysis of refractive, accommodative, and binocular anomalies. Pediatric examination techniques. Advanced methods of examining the peripheral ocular funds; anterior angle evaluation.

Clinical Examination of the Visual System: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Optom 200B

**Repeat rules:** Course may be repeated for credit when topic changes.

### Hours & Format

**Fall and/or spring:** 15 weeks - 4 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

Clinical Examination of the Visual System: Read Less [\[-\]](#)

## OPTOM 200D Clinical Examination of the Visual System 2 Units

Terms offered: Spring 2017, Spring 2016, Spring 2015

Modification of the exam sequence for specific patient needs. Evaluation and management of tear film disorders; analysis of vision with cataract. Patient management and professional communications; legal and ethical issues; managed care and optometry.

Clinical Examination of the Visual System: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** 200C, 200CL

**Repeat rules:** Course may be repeated for credit when topic changes.

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

### Additional Details

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

Clinical Examination of the Visual System: [Read Less](#) [-]

## OPTOM 200DL Clinical Examination of the Visual System 2 Units

Terms offered: Spring 2017, Spring 2016, Spring 2015

Modification of the exam sequence for specific patient needs. Evaluation and management of tear film disorders; analysis of vision with cataract. Patient management and professional communications; legal and ethical issues; managed care and optometry.

Clinical Examination of the Visual System: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Optom 200C, Optom 200CL

**Repeat rules:** Course may be repeated for credit when topic changes.

### Hours & Format

### Additional Details

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

Clinical Examination of the Visual System: [Read Less](#) [-]

## OPTOM 213 Evidence Based Optometry 1 Unit

Terms offered: Fall 2015, Fall 2014, Spring 2014

Basic concepts in evidence based optometry including various clinical study designs, potential sources of bias in each design as well as development of a systematic approach to evaluate strength of evidence from published studies, to identify potential limitations and develop appreciation for the importance of evidence based practice as a practice philosophy.

Evidence Based Optometry: [Read More](#) [+]

### Rules & Requirements

**Repeat rules:** Course may be repeated for credit.

### Hours & Format

**Fall and/or spring:** 15 weeks - 1 hour of lecture per week

### Additional Details

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

**Instructor:** Liu

Evidence Based Optometry: [Read Less](#) [-]

## OPTOM 222A Optics of Ophthalmic Lenses 4 Units

Terms offered: Spring 2016, Spring 2015, Fall 2014

Optical and physical characteristics of ophthalmic lenses, to include spherical and aspherical surface of single and multifocal lens designs, and ophthalmic prisms. Lens power measurement methods, lens thickness power relationships and considerations in designing prescription eyewear. Characteristics of absorptive lenses, ophthalmic coatings, lens materials, and their role in ocular protection.

Optics of Ophthalmic Lenses: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Vision Science 203A

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

Optics of Ophthalmic Lenses: [Read Less](#) [-]

## OPTOM 222B Advanced Clinical Optics 2 Units

Terms offered: Fall 2015, Spring 2015, Fall 2014

Ophthalmic lens aberrations and minimization. Ophthalmic lens designs relating to anisometropia, aniseikonia, and high refractive errors. Optics of the eye, contact lens optics, and optical principles of low vision aids. Environmental vision and related ophthalmic standards.

Advanced Clinical Optics: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** 222A

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

### Additional Details

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

**Formerly known as:** 122B

Advanced Clinical Optics: Read Less [\[-\]](#)

## OPTOM 226A Systemic Pharmacology 2.5 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Basic pharmacology, terminology, and concepts (both pharmacodynamic and pharmacokinetic) and pharmacotherapy of medical conditions commonly encountered in clinical optometric practice (including cardiovascular disease, respiratory disease, diabetes, infection and inflammatory conditions, as well as central nervous system disorders).

Systemic Pharmacology: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Vision Science 206D

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

**Instructor:** Wildsoet

Systemic Pharmacology: Read Less [\[-\]](#)

## OPTOM 226B Ocular Pharmacology 2.5 Units

Terms offered: Spring 2017, Spring 2016, Spring 2015

Basic pharmacology, terminology, and concepts (both pharmacodynamic and pharmacokinetic) as applied to the eye and ophthalmic drugs, clinical prescribing issues including formulation, dosing and prescribing, and pharmacotherapy of anti-inflammatory, centrally acting, hormonal and other "specialist" systemic drugs.

Ocular Pharmacology: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** 226A

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

**Instructor:** Wildsoet

Ocular Pharmacology: Read Less [\[-\]](#)

## OPTOM 230A Graduate General Clinical Practice 2 - 6 Units

Terms offered: Fall 2015, Fall 2014, Fall 2013

General optometric practice for four hours per week per credit hour, including optometric examination, dispensing, consultation, and subsequent vision care of patients, performed independently by graduate student clinicians.

Graduate General Clinical Practice: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** O.D. degree

**Repeat rules:** Course may be repeated for credit.

### Hours & Format

**Fall and/or spring:** 15 weeks - 0 hours of clinic per week

## OPTOM 236A Systemic Disease and its Ocular Manifestations 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

The pathophysiology, pharmacotherapy, and clinical management of systemic and ocular diseases will be discussed through a combination of lecture and problem-based learning approaches. Disease processes will be emphasized and include cellular injury and repair, inflammation, infection, degeneration, and neoplasia. Neurologic, cardiovascular, endocrine, pulmonary, and congenital disease and their relative ocular manifestations will be presented.

Systemic Disease and its Ocular Manifestations: Read More [+]

### Rules & Requirements

**Prerequisites:** 200D. 236A is a prerequisite for 236B

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 2 hours of discussion per week

### Additional Details

**Subject/Course Level:** Optometry/Graduate

**Grading:** Letter grade.

**Instructor:** Harvey

## OPTOM 490A Optometric Spanish - Beginner Level I 1 Unit

Terms offered: Prior to 2007

This course provides an introduction to Spanish in its uses in a clinical optometry setting with the Spanish-speaking patient. Basic vocabulary and grammar acquisition and skill building exercises will help the practitioner perform conversations and procedures in simple but accurate and clear communications. The sounds and structures of Spanish, including the present tense and some other verbs will be covered. All materials will be taught and practiced in relation to their practical application in a clinical setting.

Optometric Spanish - Beginner Level I: Read More [\[+\]](#)

### Hours & Format

**Fall and/or spring:** 15 weeks - 1 hour of lecture per week

**Summer:** 8 weeks - 2 hours of lecture per week

### Additional Details

**Subject/Course Level:** Optometry/Other professional

**Grading:** Offered for satisfactory/unsatisfactory grade only.

Optometric Spanish - Beginner Level I: Read Less [\[-\]](#)

## OPTOM 490B Optometric Spanish - Intermediate Level II 1 Unit

Terms offered: Summer 2008 10 Week Session

This course provides vocabulary and grammar acquisition and skill building for the intermediate to advanced Spanish student who works with Spanish-speaking patients in the field of optometry. Emphasis is on practical, hands-on application of the materials: patient interviewing, doing various aspects of the eye exam, taking a history, and giving diagnostic, treatment, and follow-through information to the patient, with appropriate cultural sensitivity, taking into consideration the socio-cultural background of the patient. The goal is accurate and sophisticated communication.

Optometric Spanish - Intermediate Level II: Read More [\[+\]](#)

### Hours & Format

**Fall and/or spring:** 15 weeks - 1 hour of lecture per week

**Summer:** 8 weeks - 2 hours of lecture per week

### Additional Details

**Subject/Course Level:** Optometry/Other professional

**Grading:** Offered for satisfactory/unsatisfactory grade only.

Optometric Spanish - Intermediate Level II: Read Less [\[-\]](#)

## OPTOM 499 Supervised Independent Study 1 - 12 Units

Terms offered: Spring 2018, Fall 2017, Spring 2017

Independent study under control of Associate Dean for Student Affairs.

Supervised Independent Study: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Consent of instructor

**Repeat rules:** Course may be repeated for credit.

### Hours & Format

**Fall and/or spring:** 15 weeks - 1-12 hours of independent study per week

### Summer:

6 weeks - 2.5-18 hours of independent study per week

8 weeks - 1.5-22.5 hours of independent study per week

### Additional Details

**Subject/Course Level:** Optometry/Other professional

**Grading:** Offered for satisfactory/unsatisfactory grade only.

Supervised Independent Study: Read Less [\[-\]](#)

## Vision Science

### VIS SCI 24 Freshman Seminars 1 Unit

Offered through: Optometry

Terms offered: Spring 2018, Fall 2017, Spring 2017

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Enrollment limited to 15 freshmen.

Freshman Seminars: Read More [\[+\]](#)

### Rules & Requirements

**Repeat rules:** Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes.

### Hours & Format

**Fall and/or spring:** 15 weeks - 1 hour of seminar per week

### Additional Details

**Subject/Course Level:** Vision Science/Undergraduate

**Grading/Final exam status:** The grading option will be decided by the instructor when the class is offered. Final exam required.

Freshman Seminars: Read Less [\[-\]](#)

## VIS SCI 39 Freshman and Sophomore Seminar 1.5 - 3 Units

Offered through: Optometry

Terms offered: Fall 2017, Fall 2016, Fall 2015

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester. Enrollment limits are set by the faculty but the suggested limit is 25.

Freshman and Sophomore Seminar: Read More [\[+\]](#)

### Rules & Requirements

**Repeat rules:** Course may be repeated for credit when topic changes.

### Hours & Format

**Fall and/or spring:** 15 weeks - 1.5-3 hours of seminar per week

### Additional Details

**Subject/Course Level:** Vision Science/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.

Freshman and Sophomore Seminar: Read Less [\[-\]](#)

## VIS SCI 84 Sophomore Seminar 1 or 2 Units

Offered through: Optometry

Terms offered: Spring 2018, Fall 2017, Fall 2016

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Sophomore Seminar: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** At discretion of instructor

**Repeat rules:** Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes.

### Hours & Format

#### Fall and/or spring:

5 weeks - 3-6 hours of seminar per week

10 weeks - 1.5-3 hours of seminar per week

15 weeks - 1-2 hours of seminar per week

#### Summer:

6 weeks - 2.5-5 hours of seminar per week

8 weeks - 1.5-3.5 hours of seminar and 2-4 hours of seminar per week

### Additional Details

**Subject/Course Level:** Vision Science/Undergraduate

**Grading/Final exam status:** The grading option will be decided by the instructor when the class is offered. Final exam required.

**Prerequisites:** Consent of instructor

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

### Additional Details

**Subject/Course Level:** Vision Science/Graduate

**Grading:** Letter grade.

Anatomy and Vegetative Physiology of the Eye: Read Less [-]

## VIS SCI 212E Color Vision and Visual Sensitivity 2 Units

Offered through: Optometry

Terms offered: Spring 2017, Spring 2016, Spring 2015

Introduction for graduate students to sensory aspects of light and color vision including: psychophysical methods, spectral response of the eye, mechanisms of sensitivity control, dark adaptation, color discrimination, mechanisms of normal and defective color vision.

Color Vision and Visual Sensitivity: Read More [+]

### Rules & Requirements

**Prerequisites:** Consent of instructor

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

### Additional Details

**Subject/Course Level:** Vision Science/Graduate

**Grading:** Letter grade.

Color Vision and Visual Sensitivity: Read Less [-]

## VIS SCI 212F Spatial and Binocular Vision, Eye Movements, and Motion Perception 2 Units

Offered through: Optometry

Terms offered: Spring 2017, Spring 2016, Spring 2015

Introduction for graduate students to human spatial vision including contrast sensitivity, visual acuity, and spatial localization. Introduction to eye movements, motion perception, and motor and sensory aspects of binocular vision including pursuit, vergence, and saccadic eye movements, accommodation, stereopsis, and binocular space perception. Perception of real and apparent motion.

Spatial and Binocular Vision, Eye Movements, and Motion Perception:

## VIS SCI 212G Molecular Genetics of Vertebrate Eye Development and Diseases 2 Units

Offered through: Optometry

Terms offered: Spring 2017, Spring 2016, Spring 2015

The primary focus of this course is to teach the molecular basis of vertebrate eye development and related disease. This course will cover some of the basic principles of molecular and cell biology, commonly used techniques and experimental approaches, as well as the biological mechanisms for vertebrate eye development and related eye diseases. Recent progress in identifying important ocular genes and the approaches used to identify them will be discussed.

Molecular Genetics of Vertebrate Eye Development and Diseases: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Graduate student in vision science or consent of instructor in charge

### Hours & Format

**Fall and/or spring:** 5 weeks - 3 hours of lecture per week

### Additional Details

**Subject/Course Level:** Vision Science/Graduate

**Grading:** Letter grade.

**Instructor:** Gong

Molecular Genetics of Vertebrate Eye Development and Diseases: Read Less [\[-\]](#)

## VIS SCI 215 Visual System Development 2 Units

Offered through: Optometry

Terms offered: Fall 2015, Fall 2014, Fall 2013

Development of the eye and visual system. Normal development of the eye, retina, and central visual pathways. Effects of visual deprivation. Assessment of optical and visual function in human infants. Refraction and refractive error in infants and children. Development of visuomotor function, spatial vision, color vision, binocular vision, and depth perception.

Visual System Development: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** 206B

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

### Additional Details

**Subject/Course Level:** Vision Science/Graduate

**Grading:** Letter grade.

**Formerly known as:** 115

Visual System Development: Read Less [\[-\]](#)

## VIS SCI 217 Oculomotor Functions and Neurology 2 Units

Offered through: Optometry

Terms offered: Spring 2016, Spring 2015, Spring 2014

Neuro-anatomical pathways for the control of eye position and movement; gaze holding, image stabilization and tracking eye movement systems; oculomotor signs of disorders of the central nervous system (palsies, nystagmus, ophthalmoplegia, cog-wheel pursuits, saccadic dysmetria); the near visual-motor response and the synergistic coupling of accommodation and convergence; binocular misalignment (heterophoria and fixation disparity); and presbyopia.

Oculomotor Functions and Neurology: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** 203B or consent of instructor

### Hours & Format

**Fall and/or spring:** 15 weeks - 1.5 hours of lecture and 10 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Vision Science/Graduate

**Grading:** Letter grade.

**Formerly known as:** 117

Oculomotor Functions and Neurology: Read Less [\[-\]](#)

## VIS SCI 219 Binocular Vision and Space Perception 2 Units

Offered through: Optometry

Terms offered: Spring 2016, Spring 2015, Spring 2014

Perception of space, direction, and distance. Binocular retinal correspondence, horopters, differential magnification effects and anomalies of binocular vision development. Sensory vision, local stereopsis, static and dynamic stereopsis, binocular depth cues. Binocular Vision and Space Perception: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** 203A-203B

### Hours & Format

**Fall and/or spring:** 15 weeks - 1.5 hours of lecture and 10 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Vision Science/Graduate

**Grading:** Letter grade.

**Formerly known as:** 118

Binocular Vision and Space Perception: Read Less [\[-\]](#)

## VIS SCI 230 Ethics in Scientific Research 2 Units

Offered through: Optometry

Terms offered: Spring 2016, Spring 2015, Spring 2014

This seminar will examine a range of ethical issues that arise in the process of doing science. Beginning with the philosophical and social foundations, we will consider the pathogenesis of fraud, statistics and deception, the ethics of authorship and publication, research with human subjects, the use of animals, the definition(s) of misconduct and the difference between misconduct and questionable research practices, the relationship between industry and science, and finally, the responsibilities and obligations of the scientist in society.

Ethics in Scientific Research: Read More [\[+\]](#)

### Hours & Format

**Fall and/or spring:** 15 weeks - 30 hours of seminar per week

### Additional Details

**Subject/Course Level:** Vision Science/Graduate

**Grading:** Letter grade.

Ethics in Scientific Research: Read Less [\[-\]](#)

## VIS SCI 260A Optical and Neural Limits to Vision 3 Units

Offered through: Optometry

Terms offered: Fall 2017

The course will provide an overview of the early stage limits to human vision, from the eye's optics to sampling and processing in the retina. Students will learn basic optical properties of the eye as well as objective and subjective techniques on how to measure limits of human vision. The class will comprise a combination of lectures and active learning by the students in the form of a project, to be presented at the end of the semester. This is one of the four courses that form the Vision Science core curriculum.

Optical and Neural Limits to Vision: Read More [\[+\]](#)

### Rules & Requirements

**Repeat rules:** Course may be repeated for credit when topic changes.

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Vision Science/Graduate

**Grading:** Letter grade.

**Instructor:** Austin Roorda

Optical and Neural Limits to Vision: Read Less [\[-\]](#)

## VIS SCI 260B Introduction to Ocular Biology 3 Units

Offered through: Optometry

Terms offered: Fall 2017

The course will provide an overview of eye development, anterior eye ocular anatomy and physiology and ocular disease. The course will be a combination of didactic lectures and problem-based learning. This is one of the four courses that form the Vision Science core curriculum.

Introduction to Ocular Biology: Read More [+]

### Rules & Requirements

**Repeat rules:** Course may be repeated for credit when topic changes.

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Vision Science/Graduate

**Grading:** Letter grade.

**Instructor:** Suzanne Fleiszig

Introduction to Ocular Biology: Read Less [-]

## VIS SCI 260C Introduction to Visual Neuroscience 3 Units

Offered through: Optometry

Terms offered: Not yet offered

The course will provide an overview of the neuroscience of vision, spanning the entire neural pathway from retinal neurobiology to cortical processing of visual signals. The class will comprise a combination of lectures and active learning by the students in the form of a project, to be presented at the end of the semester. This is one of the four courses that form the Vision Science core curriculum.

Introduction to Visual Neuroscience: Read More [+]

### Rules & Requirements

**Repeat rules:** Course may be repeated for credit when topic changes.

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 1 hour of discussion per week

**Grading:** Letter grade.

**Instructor:** Michael Silver

Introduction to Visual Neuroscience: Read Less [-]

## VIS SCI 260D Seeing in Time, Space and Color 3 Units

Offered through: Optometry

Terms offered: Not yet offered

The course will provide an overview of how we see in time (temporal signal processing, eye motion, motion detection), space (stereo vision, depth perception), and color as well as the anatomical and physiological factors that facilitate these capabilities. The course will be series of didactic lectures. This is one of the four courses that form the Vision Science core curriculum

## VIS SCI 262 Visual Cognitive Neuroscience 3 Units

Offered through: Optometry

Terms offered: Spring 2016, Spring 2015, Spring 2013

The course will provide an overview of visual cognitive neuroscience, drawing from neuroanatomy, neurophysiology in humans and animal models, psychophysics, neuroimaging, neuropharmacology, neuropsychology, and computational models of vision and cognition. Topics will include basic anatomy and physiology of the mammalian visual system, motion perception and processing, depth perception and representation of visual space, brightness and color, object and face recognition, visual attention, developmental and adult plasticity, perceptual learning, multisensory integration, and visual awareness.

Visual Cognitive Neuroscience: Read More [+]

### Rules & Requirements

**Prerequisites:** Consent of instructor

**Repeat rules:** Course may be repeated for credit.

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

**Grading:** Letter grade.

**Instructor:** Silver

Visual Cognitive Neuroscience: Read Less [-]

## VIS SCI 265 Neural Computation 3 Units

Offered through: Optometry

Terms offered: Fall 2016, Fall 2015, Fall 2014

This course provides an introduction to the theory of neural computation. The goal is to familiarize students with the major theoretical frameworks and models used in neuroscience and psychology, and to provide hands-on experience in using these models. Topics include neural network models, supervised and unsupervised learning rules, associative memory models, probabilistic/graphical models, and models of neural coding in the brain.

Neural Computation: Read More [ + ]

### Rules & Requirements

**Prerequisites:** Calculus, differential equations, basic probability and statistics, linear algebra, and familiarity with high level programming languages such as Matlab

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

### Additional Details

**Subject/Course Level:** Vision Science/Graduate

**Grading:** Letter grade.

**Instructor:** Olshausen

Neural Computation: Read Less [ - ]

## VIS SCI C265 Neural Computation 3 Units

Offered through: Optometry

Terms offered: Prior to 2007

This course provides an introduction to the theory of neural computation. The goal is to familiarize students with the major theoretical frameworks and models used in neuroscience and psychology, and to provide hands-on experience in using these models. Topics include neural network models, supervised and unsupervised learning rules, associative memory models, probabilistic/graphical models, and models of neural coding in the brain.

## VIS SCI C280 Computer Vision 3 Units

Offered through: Optometry

Terms offered: Spring 2018, Spring 2017, Spring 2016

Paradigms for computational vision. Relation to human visual perception. Mathematical techniques for representing and reasoning, with curves, surfaces and volumes. Illumination and reflectance models. Color perception. Image segmentation and aggregation. Methods for bottom-up three dimensional shape recovery: Line drawing analysis, stereo, shading, motion, texture. Use of object models for prediction and recognition.

Computer Vision: Read More [ + ]

### Rules & Requirements

**Prerequisites:** Knowledge of linear algebra and calculus. Mathematics 1A-1B, 53, 54 or equivalent

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

### Additional Details

**Subject/Course Level:** Vision Science/Graduate

**Grading:** Letter grade.
